

Dear Neighbors of Heritage Greens,

After months of evaluating and planning the CDD has started the project to update and improve the landscaping at the entrance of our neighborhood. Many of you have seen the plan on the landscape architect drawing boards that have been on display in the Clubhouse for the past few months. The drawing boards will be available again in the Clubhouse for anyone who did not get to see them before.

The new design will simplify and enhance the entrance landscape of Heritage Greens. This includes the area along Immokalee Rd on both sides of the entrance, the Guard house area and the island behind it and trimming of some trees on Heritage Greens Drive.

Due to the advanced planning and budgeting done by the CDD Board there will be No Change in CDD fees, nor any assessments needed to complete this project.

This project will continue for about a month and our landscaper will try to minimize any inconvenience to our residents. Please contact the CDD management company (Dorrill Property Management) with any other questions or concerns at 239-592-9115.
